

INTRODUCTION

TM-DWS-200 is a high-power precision soldering station. It is a hand tool commonly used in electronic welding processes. TM-DWS-200 built-in high-power pure copper transformer, adapts to 110-250V voltage input with many convenient function setting to bring users faster and more accurate operation.

FEATURES

- Fast heating up in 2s
- Support F245/F210 type handles
- Support 3 preset temperatures
- Precise temperature control
- 110-250V wide voltage input
- Languages: English/Chinese

TECHNICAL SPECIFICATIONS

Temperature Range	100-450°C	ESD Protection	✓
Temperature Accuracy	±5°C; 2%	Working Voltage	110~250V
Heat-Up Time	2s melt Tin @ 200W	Input Fuse	3A

GENERAL CHARACTERISTICS

Screen	2.4-inch HD color screen	Standard Carton	68*48*27.5cm
Product Net Weight	1505g	Carton Gross Weight	16.5kg
Product Size	156*96*103mm	Quantity Per Carton	10PCS
